

Immigration

(excluding asylum applications)

The below table sets out our typical fees for our most common immigration and nationality applications. Whilst we charge on an hourly rate basis in relation to such matters, we are normally able to agree a capped/ fixed fee.

Such capped fee includes discussing your circumstances and options, providing detailed advice on the requirements for the application you intend to make including advice on the process, preparing the application for submission and submitting the same. The fee will also include advising you of the outcome of the application and, if applicable, providing outline advice on the next application you need to make. The capped fee will not include advising on an administrative review or appeal if the application is not granted.

The fees set out below are for our legal fees only, they do not include VAT, or third party costs (disbursements) including in particular any Home Office fees required for the application.

Please note that not all applications will fall into the below estimated fees. Some cases are more complex and require materially more advice and time spent. In all cases a fee estimate will be provided at the outset of an instruction and, where capped fees are possible, these can be agreed. If there is a material change during the course of our instruction which we consider will impact upon our fees, we will discuss this with you before incurring additional fees.
